

NEW!

Employee Digital Health Screening

Ensure the safety of your employees as they return to the workplace environment using a scalable and cost effective solution designed for organizations with multiple locations and geographies.

Safetemps Provides Reporting for Business Leaders Across Your Organization

Executive Leaders

Receive real-time reporting on the number of employees screened and those denied entry.

HR Departments

Track employees that are in self-quarantine or that have been asked to work remotely.

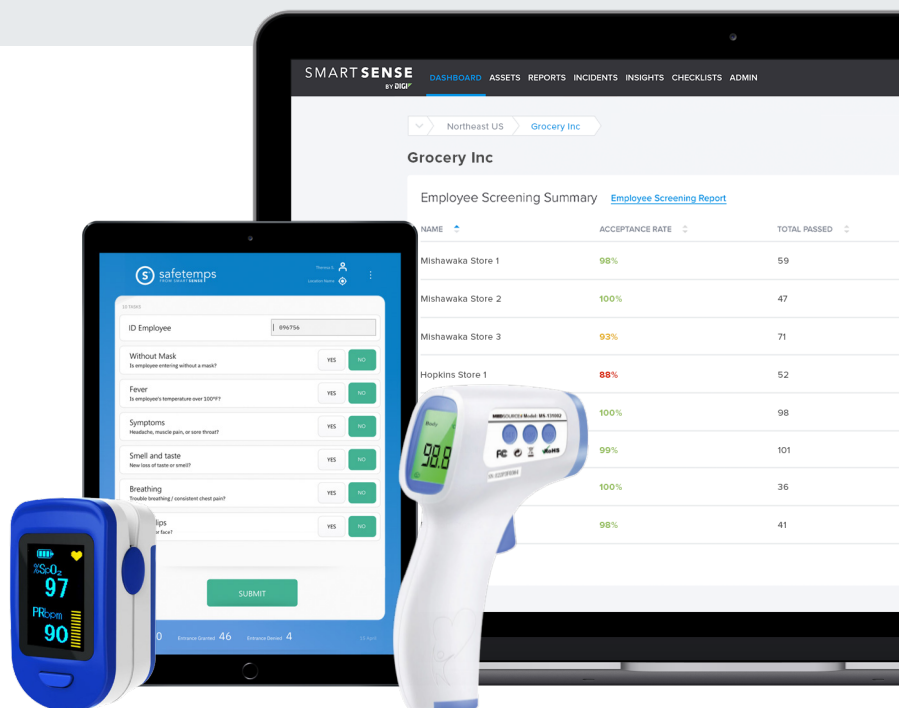

Managers and Supervisors

Monitor the wellness of all your employees at the start of each work day or shift.

Reopen Confidently.

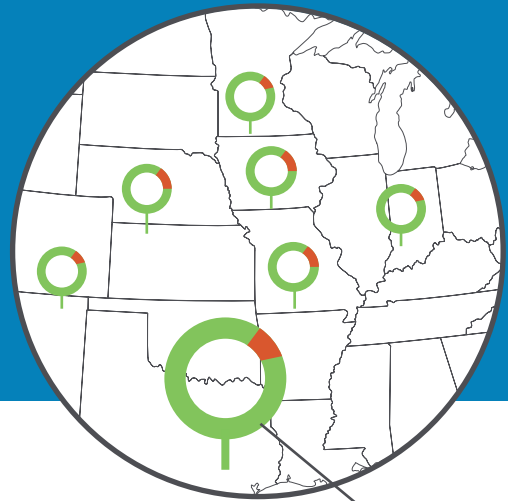

- ✓ Screen with a ready-to-use, questionnaire that will identify individuals that are at-risk and should be denied entry.
- ✓ Use an IR thermometer or fingertip pulse oximeter to instantly test for hidden symptoms.
- ✓ Make data-driven decisions about the wellness of your workforce using enterprise-wide reporting tools.

Safetemps is available software-only or packaged with your choice of IR thermometer or fingertip pulse oximeter.

An IoT Platform for Employee Safety

Safetemps from SmartSense is a flexible and quickly deployable solution to enable visibility into employee wellness for organizations of all sizes.

How Safetemps Works

Screening Simplified.

Safetemps ships with a ready-to-use employee health questionnaire or it can be configured for your locations. Optionally you can combine with your choice of IR thermometer or fingertip pulse oximeter to complete a robust health screening solution.
